Vitest | Testing Library | MSW | Postman

DEVOPS & AI

GitHub Actions | Netlify | npm / pnpm | Webhooks | LLM APIs | AI coding tools | No-code / low-code automation

INTEGRATIONS

Stripe | Google Workspace | Slack | Notion

DEV TOOLS

VS Code | Chrome DevTools | React DevTools | axe DevTools | Prettier | oxlint

PROFILE

Junior developer with a Bachelor's degree in Game Development (cum laude) from DAE Howest, now retraining as a Full Stack Developer at Syntra West. I combine the analytical, problem-solving mindset of a game programmer with modern web technologies: React, TypeScript, Node.js and PostgreSQL. I'm looking for a full stack internship where I can contribute to real-world software. My full stack skills are still in training: the web technologies marked as learning are being taught at Syntra West and will be in place by the time my internship starts.

EDUCATION

Full Stack Developer 2026 – present
Syntra West | currently learning, ready before the internship starts

Bachelor in Game Development Graduated June 2026 – Cum Laude
Digital Arts & Entertainment (DAE), Howest

ASO Math & Sciences High school | strong analytical and mathematical foundation

PROFESSIONAL EXPERIENCE

Unity Developer Intern

National Lottery | SCRUM environment

- Built an educational Unity application for internal training
- Implemented core logic, interaction flow and user interface
- Integrated the project into the FlowSpark e-learning platform via SCORM
- Worked daily with analysts and developers in stand-ups
- Practised documentation, version control and structured workflows

PROJECTS

VR Team Project FEATURED

Collaborative VR application built in Unity within a SCRUM team. Gameplay programming and feature implementation, with a shared Git workflow.

Unity | C# | SCRUM | Git

Educational Software Projects

- Several Unity applications focused on interactive learning and training

Personal Portfolio Website

- Designed and built my own portfolio: https://mathijswarlop.github.io/
